

# SHEET MATERIAL GRAB

# SHEET MATERIAL GRAB

GIS sheet material grab is suitable for safe transport of extensive sheets from wood, plastic or other materials and is a cost-effective alternative to a complete GIS vacuum handling system. Especially for the application in joiner's workshop and sawmills with small ceiling heights, the sheet material grab provides many benefits. This compact device from steel is very robust and durable.

## YOUR BENEFITS

The operating handle with its unique release mechanism enables easily practical handling of the sheet. The transport good is clamped in the middle of the center of gravity. The clamping surfaces are protected on both sides with a gentle rubber coating. Through the rear rigid gripper element, the sheet can be straighten up from the horizontal to the vertical position. The refined gripper mechanism increases the surface pressure the heavier the transport good is.

## Standard execution

---

Lifting capacity up to 250 kg

---

Gripper opening 0 - 60 mm

---

Empty weight 11 kg

---

Steel, zinc-plated

---

Clamping surfaces with friction linings

---

Article number 9361.2050.2

---

Dimensioned drawing 9361.9202.5

---

## Accessories and options

---

Gripper opening 20 - 80 mm

---

Other gripper openings on request

---

Special lengths operating handle

---

Friction linings as replacement set

---

## Crane systems

GISKB steel crane construction kit for line-bound or all-round goods handling. GISKB aluminium crane system, slewing pillar and wall cranes for smooth handling of transport goods. Travelling cranes and slewing cranes made of steel profiles for heavier loads.

## Hoisting equipment

Over 50 years experience in the manufacture of electric chain hoists: robust, durable, reliable and highly resistant to wear. Simple maintenance. Various special versions for every application area. Wide range of accessories and options.

## Vacuum handling systems

GIS vacuum handling systems for the ergonomic and gentle handling of goods made of different materials like wood, glass, stone, metal or plastic. In combination with the appropriate crane system.

**GIS AG – the specialist for crane systems** Founding of the GIS AG in 1957 | With own subsidiary in Germany since 1966 | Development and production of electric chain hoists in Switzerland for over 50 years | Swiss manufacturer of complete crane systems inc. hoisting equipment and vacuum lifters | Certified to ISO 9001 since 1994 | Complete market services from project planning to installation, start-up and maintenance | International sales network with over 50 qualified partners worldwide

Swiss Lifting Solutions

Certified to ISO 9001
